Amendments to the Claims:

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently amended) A mobile apparatus comprising:

first interface means for communicating over a first communication network using a first data format;

second interface means for communicating over a second communication network using a second data format; and, ~~processing means, said processing means~~

a processor

wherein

the processor is: being

coupled to the first and second interface means, ~~and being~~

configurable to forward first data received from the first network to the second network after conversion of the received first data from the first format to the second format, and

configured by data received from either one of the first and the second communication networks.

2. (Currently amended) The apparatus of Claim 1, wherein

the ~~processing means~~processor is configurable to forward second data received from the second network to the first network after conversion of the received second data from the second format to the first format.

3. (Original) The apparatus of Claim 1, wherein

the received first data is text message data.

4. (Original) The apparatus of Claim 1, wherein
the first communication network is a radio telephony network.
 5. (Original) The apparatus of Claim 1, wherein
the first data format is a Short Message Service data format.
 6. (Original) The apparatus of Claim 1, wherein
the second communication network is a Personal Access Network.
 7. (Currently amended) The mobile apparatus of Claim 1, wherein
the ~~processing means~~processor is configured by a user.
 8. (Currently amended) The mobile apparatus of Claim 1, wherein
the ~~processing means~~processor is configured by a speech command.
 9. (Currently amended) The mobile apparatus of Claim ~~1~~10, wherein
the ~~processing means~~processor is configured by data received from either one of the
first and the second communication networks.

10. (Currently amended) ~~The A~~ mobile apparatus of ~~Claim 1~~, further comprising:

first interface means for communicating over a first communication network using a first data format;

second interface means for communicating over a second communication network using a second data format;

a processor; and

a user interface for exchanging data of a third format with a user; and,

wherein,

the ~~processing means~~processor is:

coupled to the first and second interface means,

configurable to forward first data received from the first network to the second network after conversion of the received first data from the first format to the second format,
and

configurable to forward third data received from either one of the first network and the second network to the user interface after conversion of the received third data to the third format.

11. (Original) The mobile apparatus of Claim 10, further comprising

a memory arrangement for storing the converted third data of the third format.

12. (Currently amended) A communication system comprising:

a first device for exchanging data over a first communication network;

a second device for exchanging data over a second communication network;

a mobile apparatus comprising:

first interface means for communicating with the first device using a first data format;

second interface means for communicating with the second device using a second data format; and, ~~processing means, said processing means~~

a processor;

wherein

the processor is: being

coupled to the first and second interface means, and being
configurable to forward data received from the device to the base station after
conversion of the received data from the first format to the second format, and
configurable by data received from either one of the first and the second
communication networks.

13. (Original) The system of Claim 12, wherein

the second communication network is a telephony network.

14. (Original) The system of Claim 12, wherein

the first communication network is a Wireless Personal Access Network.

15. (New) The apparatus of Claim 10, wherein
the processor is configurable to forward second data received from the second network to the first network after conversion of the received second data from the second format to the first format.
16. (New) The apparatus of Claim 10, wherein
the received first data is text message data.
17. (New) The apparatus of Claim 10, wherein
the first communication network is a radio telephony network.
18. (New) The apparatus of Claim 10, wherein
the first data format is a Short Message Service data format.
19. (New) The apparatus of Claim 10, wherein
the second communication network is a Personal Access Network.
20. (New) The mobile apparatus of Claim 10, wherein
the processor is configured by a user.
